

SEALAND BUSINESS CLUB INTERNATIONAL

of the PRINCIPALITY OF SEALAND

Revised Form for Admission in the SEALAND BUSINESS CLUB

Experiences with several candidates upon the conclusion of the contract and alterations due to the development advances of the SEALAND Generator had made a revision of the application form a necessity for quite some time. Above all we have to abandon any online application because regrettably our e-mail traffic had abusively been hacked and we generally had to discover that this method is extremely unreliable.

On the reverse side of the contract we have printed the *Aims and Benefits of the SEALAND BUSINESS CLUB* as well as the *Ethical Principles of the Principality of Sealand*, both in an updated form, as decision guidance for the applicants.

Interested persons should print out the application form, fill in their data and their requests and then send the form – signed front and back – to our office at SEALAND BUSINESS CLUB, Postfach 2366, 33351 Rheda-Wiedenbrück. We strongly recommend the use of this postal route.

Alternatively we offer to send the application by fax to +49-700-732-52631. But faxes can get lost, too, and the judicial validity of the signature thereon is still under discussion. So it would help if you send us an e-mail saying that the application has been faxed to info@principality-of-sealand.eu.

We thank you for your understanding.

After an extended membership in the SEALAND BUSINESS CLUB INTERNATIONAL a possible citizenship in the PRINCIPALITY OF SEALAND may be discussed.

SEALAND, December 2006

Ethical Principles of the PRINCIPALITY OF SEALAND

- The state of SEALAND to become a crystallisation seed for the development of society that lives in harmony with Nature and with itself,
- SEALAND undertakes the historical attempt to end the war against Nature through a global “Coalition of Sensible Persons” and with the help of the cosmic VRIL Energy.
- SEALAND aims to uncover the causation of the war against Nature and help to overcome without violence. SEALAND wants to help minimise the gradient between poverty and wealth so that the energies thus freed may be sensibly used to benefit all beings rather than becoming a self-destructive dam failure.
- SEALAND wants to utilise and enhance all forces to prepare examples for the solution of such problems like the social and mental mass pauperisation and the distraction of Nature through hardship and eagerness for power.
- SEALAND feels beholden to a modern democratic political system that not only is based upon the trust of its own citizens, but the trust of all people who endorse and support the ethical aims of SEALAND.

The aims and principles have been noted and agreed:
